Notes: 1 – Travel Time Index (TTI) is the ratio of actual to uncongested travel time. A ratio of 1.10 means 10% additional trip time due to congestion.

2 – Peak hours are Monday to Friday, 6 to 10 AM and 3 to 7 PM.

3 – Bottleneck “congestion” is defined as times when average hourly speed is half or less than the uncongested speed for that road segment.
